

Ashfield Valley Primary School—What plants grow in my local area?

Key vocabulary and knowledge

Sunlight— All plants need light from the sun to grow well.

Water—All plants need water to grow. Seeds and bulbs need water to germinate.

Temperature—This is how warm or cold something is . Some plants like cooler temperature and some like warmer temperature.

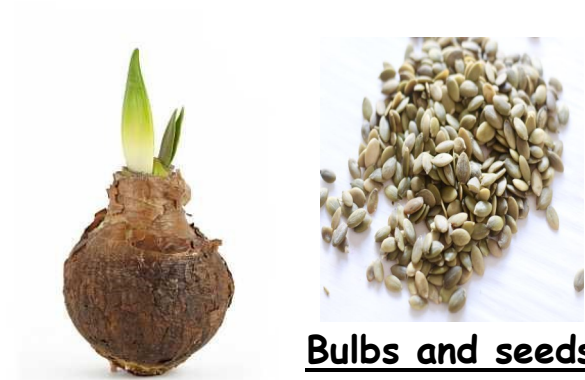

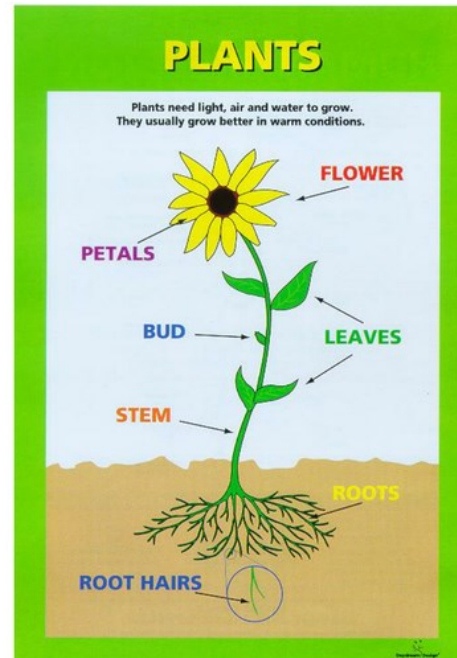

Nutrition— Food. Plants make their own food in their leaves using sunlight.

Germinate— When the conditions are right the seed or bulb will start to grow.

Sprout— When a plant sprouts, it grows new shoots.

Shoot—A shoot grows upwards from the seed towards light.

Why not try growing some seeds at home?

For a bulb or a seed to grow it needs water and warmth. Most bulbs and seeds start to grow in the spring when the weather is warmer.
